

The product eliminates the imperfections of the original system used in classic Mustangs. The suspension components are adapted to the original body version and constitute a "bolt on" assembly kit.

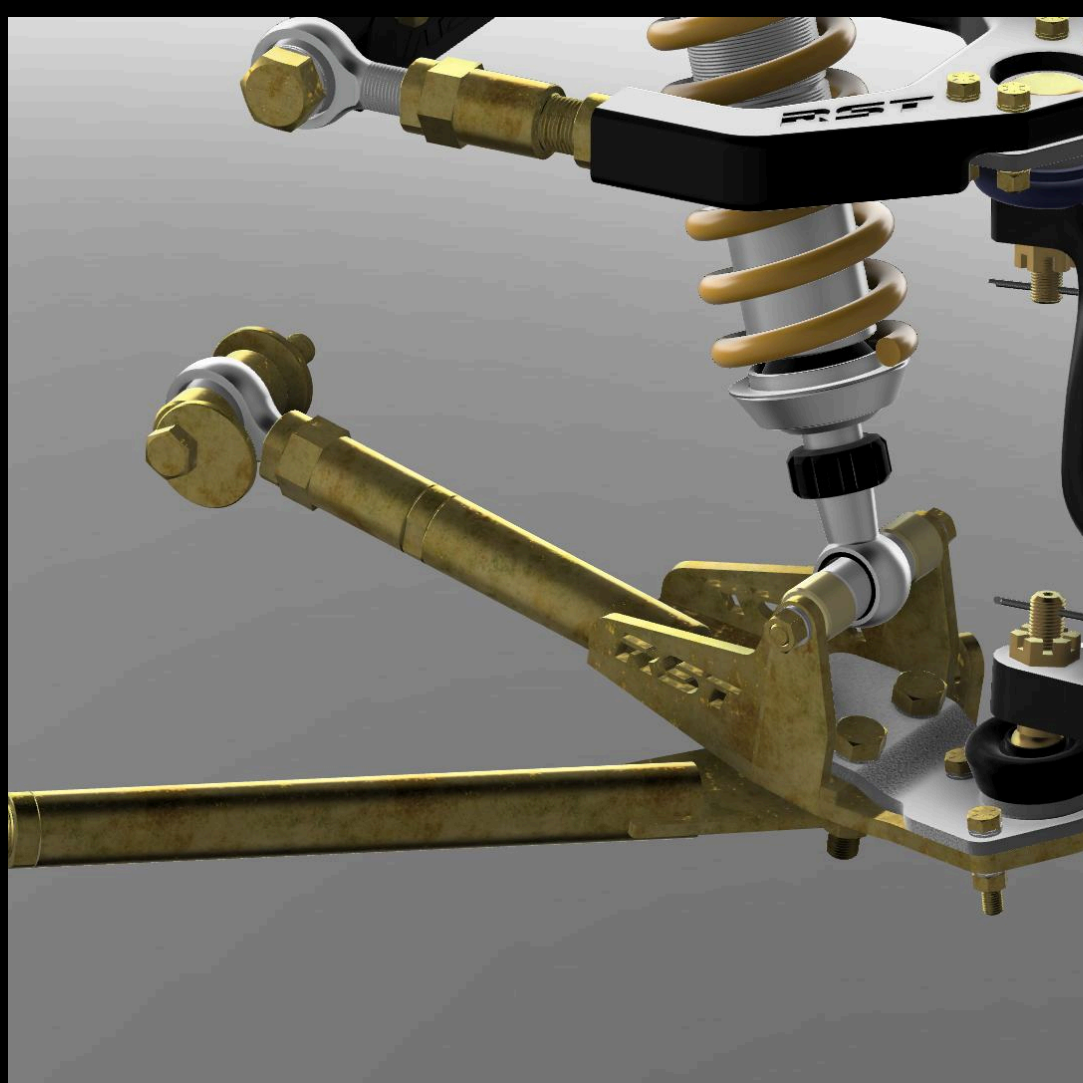

The suspension design has been created to combine high strength with low weight, and the modern solutions used in the fastening elements eliminate the typical issues of outdated original designs.

HIGH RESISTANCE
TO MECHANICAL DAMAGE

POSSIBILITY OF PRECISE
GEOMETRY ADJUSTMENT

ADJUSTABLE HEIGHT
OF BODY MOUNTING

"BOLT ON" SUSPENSION

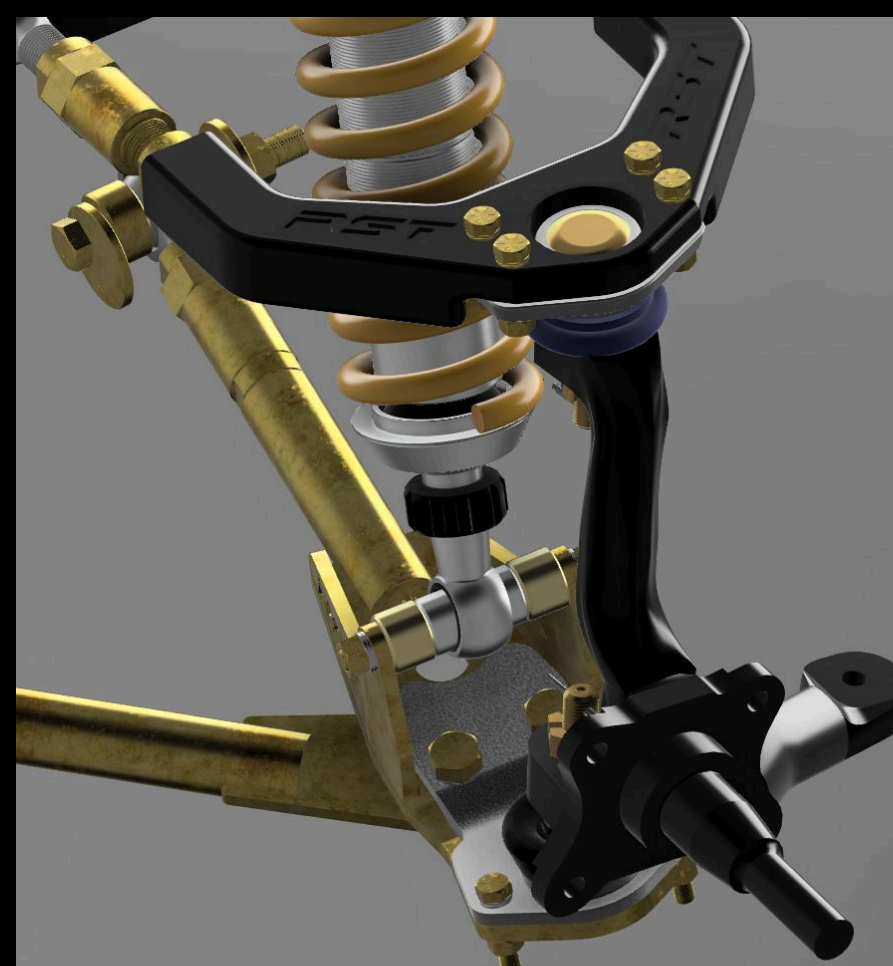

PRODUCT DESCRIPTION

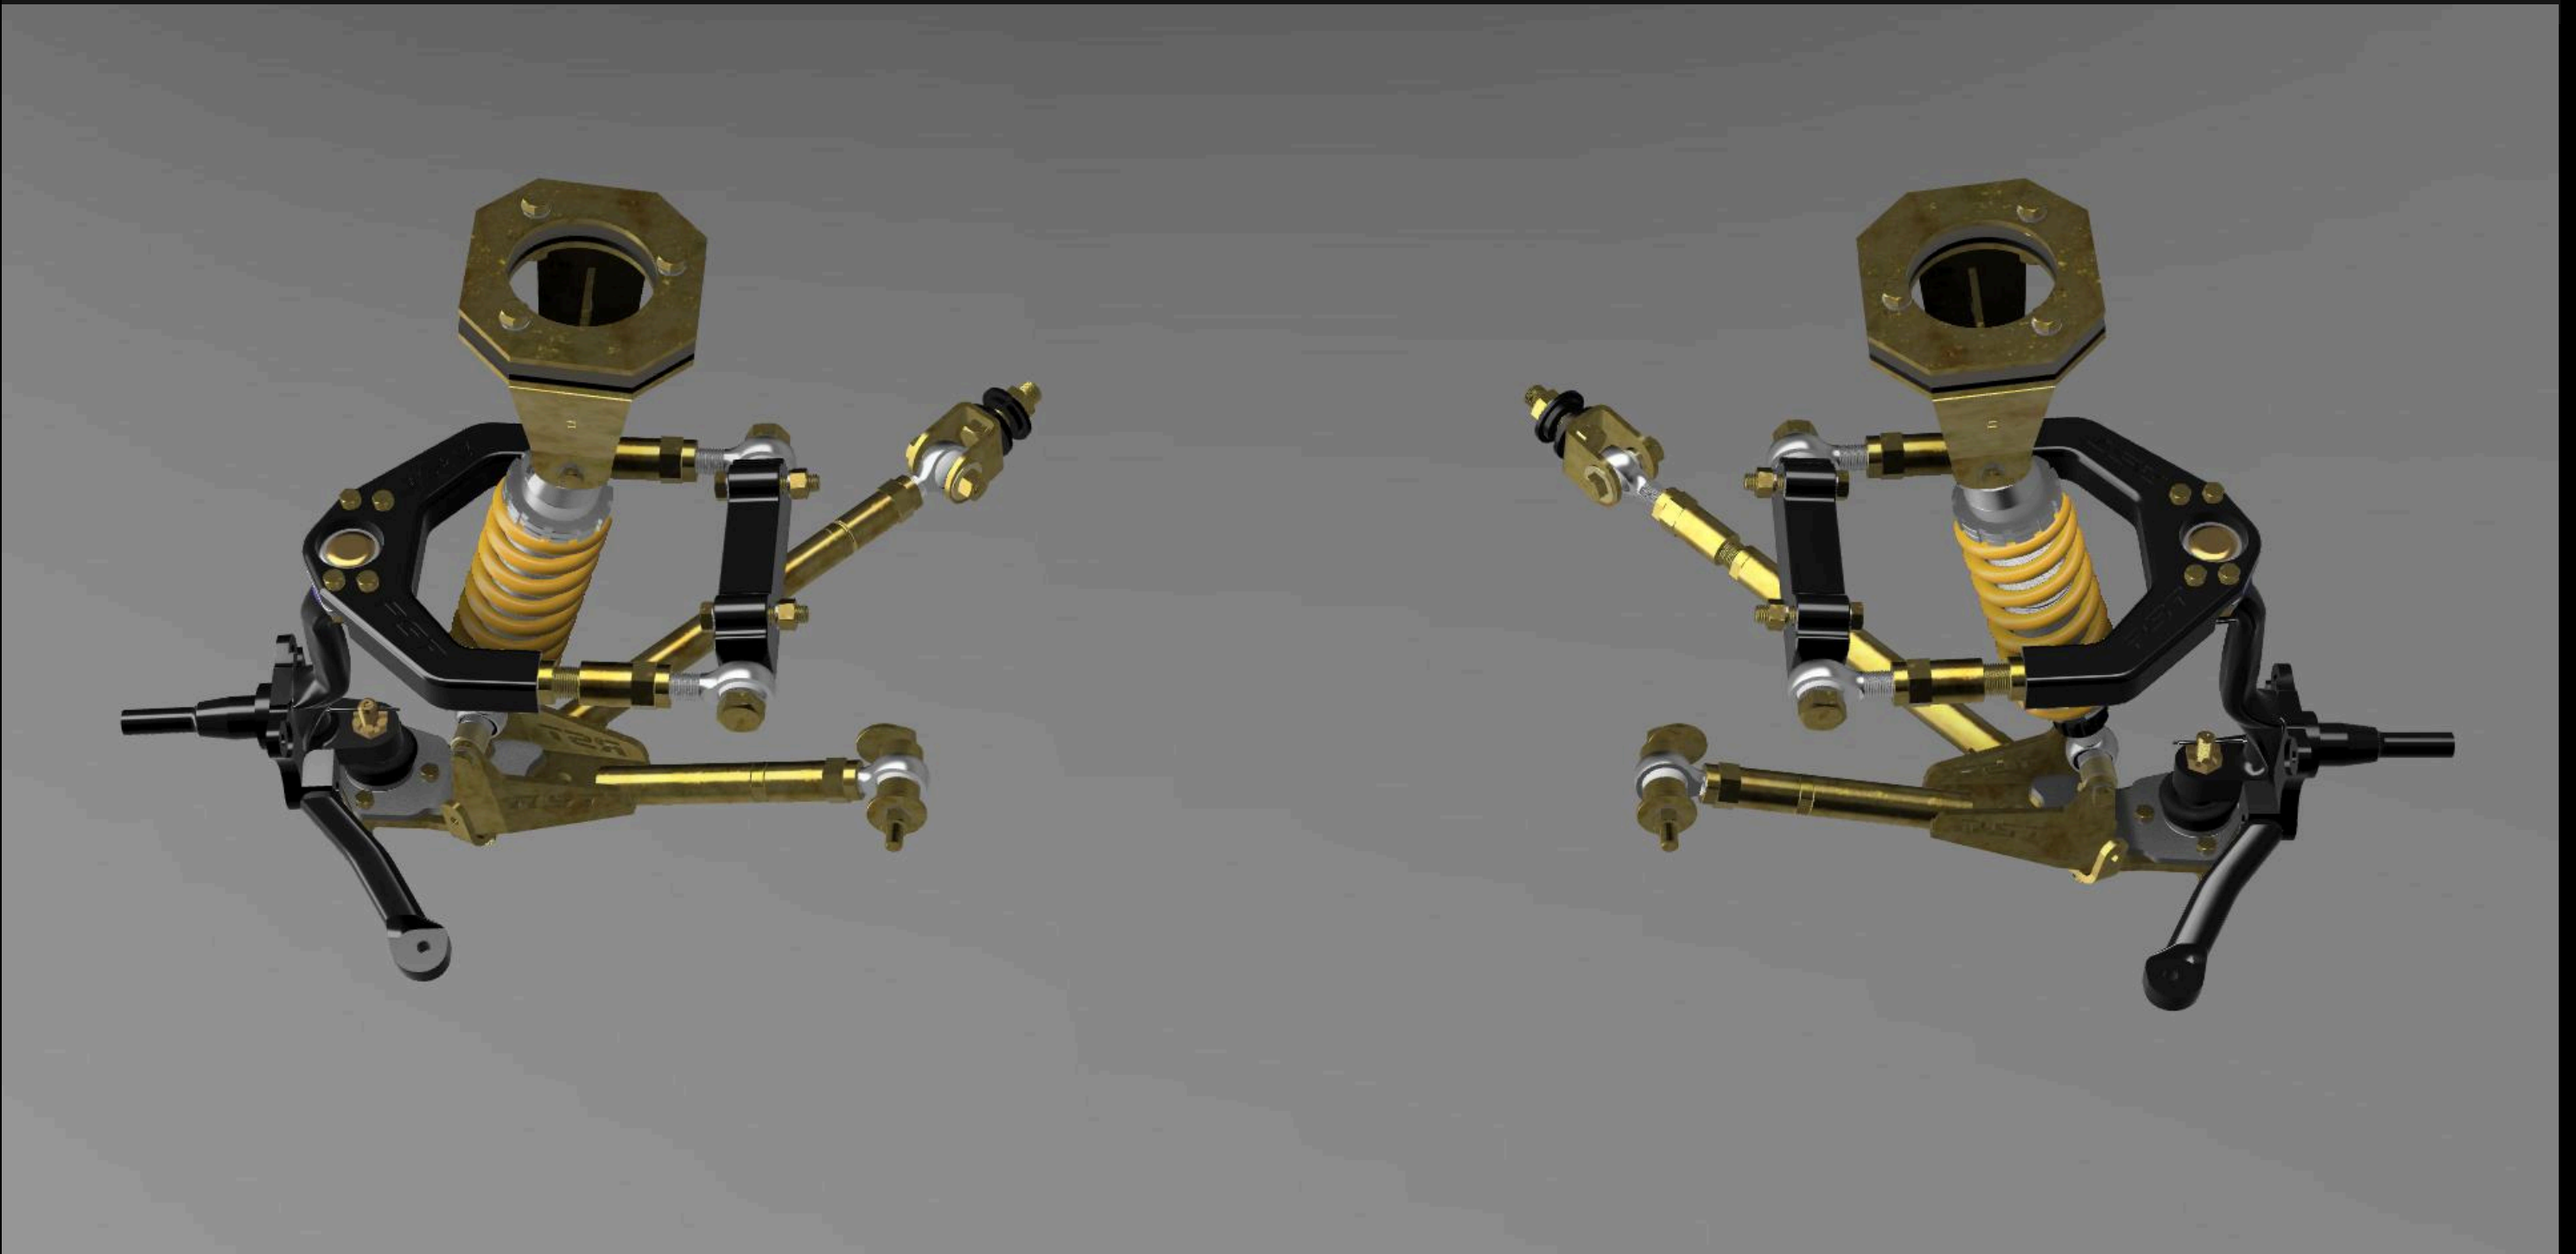

Thanks to the application of our product in your vehicle, driving properties will significantly improve. Installation does not require any modifications to the car's structure. The multi-link suspension is technologically much more effective than the original system used in these models. The rod ends allow for the adjustment of the length of both the lower and upper arms. The use of the threaded Ohlins shock absorber kit enables height adjustment of the vehicle, which improves handling by lowering the center of gravity, and also positively affects the appearance of the car.

MAIN PRODUCT FEATURES

- Adjustable Classic type front suspension system
- Suspension based on Ohlins shock absorbers
- Adjustable height and damping value
- Significant improvement in vehicle control

To reduce weight, some components have been made using CNC milling technology from 7075 aluminum. This alloy is valued for its strength and lightness. The sheet metal components were made from S355 structural steel, cut using a laser, which guarantees perfect fits. To reduce corrosion, a gold zinc plating process was applied. The rod ends that connect the arms bodies with the uniballs are made from a highly durable 40HMT steel alloy. Used for machine components with very high strength and ductility.

**THE SET INCLUDES:**

- Complete control arms (6 pcs.)
- Upper and lower shock absorber mounts with bushings (4 pcs.)
- Upper control arm mounts (2 pcs.) using the "Shelby Drop" principle
- Ohlins STX shock absorbers (2 pcs.)
- Complete uniballs (8 pcs.)
- Set of turnbuckles for control arm adjustment (8 pcs.)
- Set of control arm pins (upper and lower) (4 pcs.)
- Mounting kit

APPLICATION:

This product will fit the following model years of Ford Mustang:

Ford Mustang Fastback 1964/5-1966

Ford Mustang Fastback 1967-1968

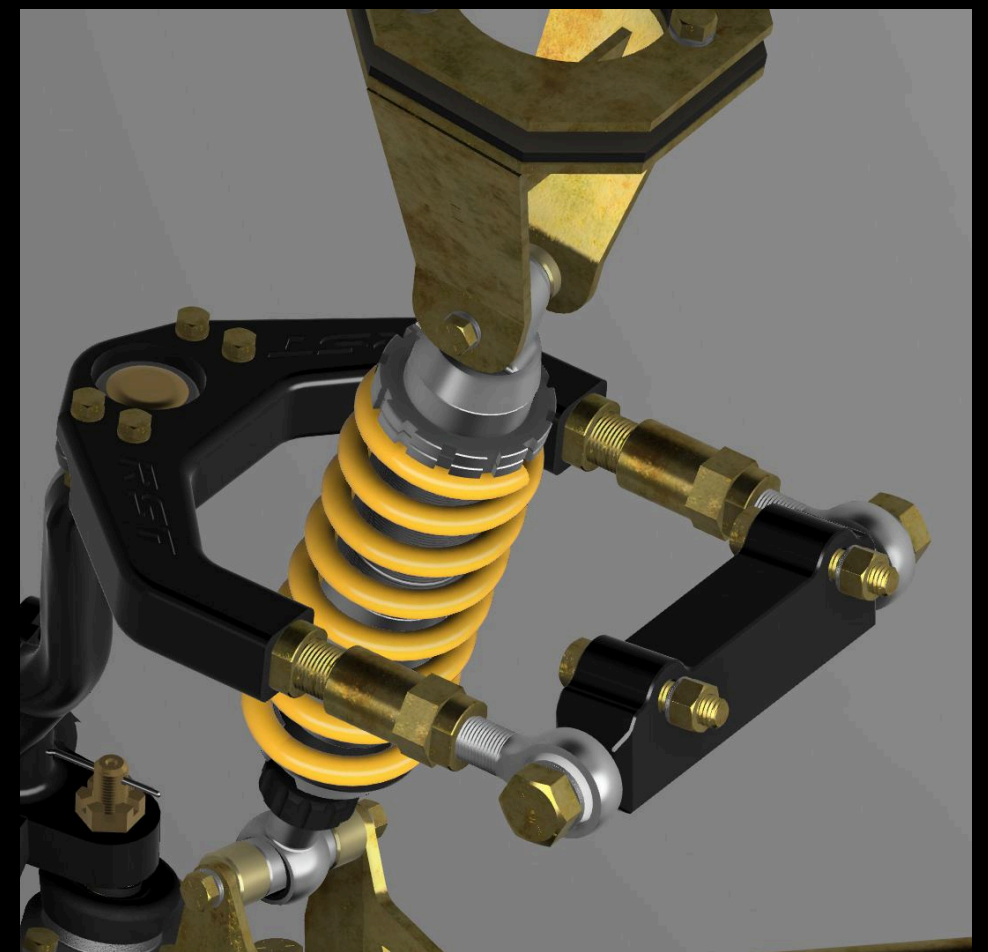

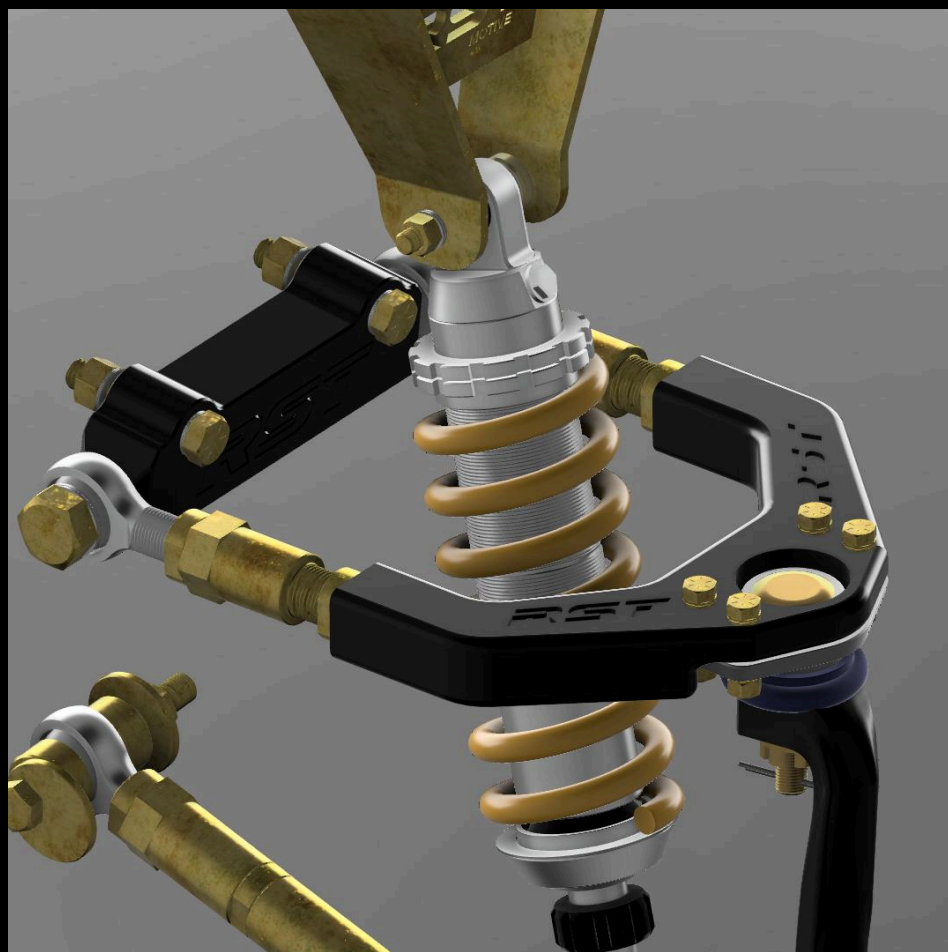

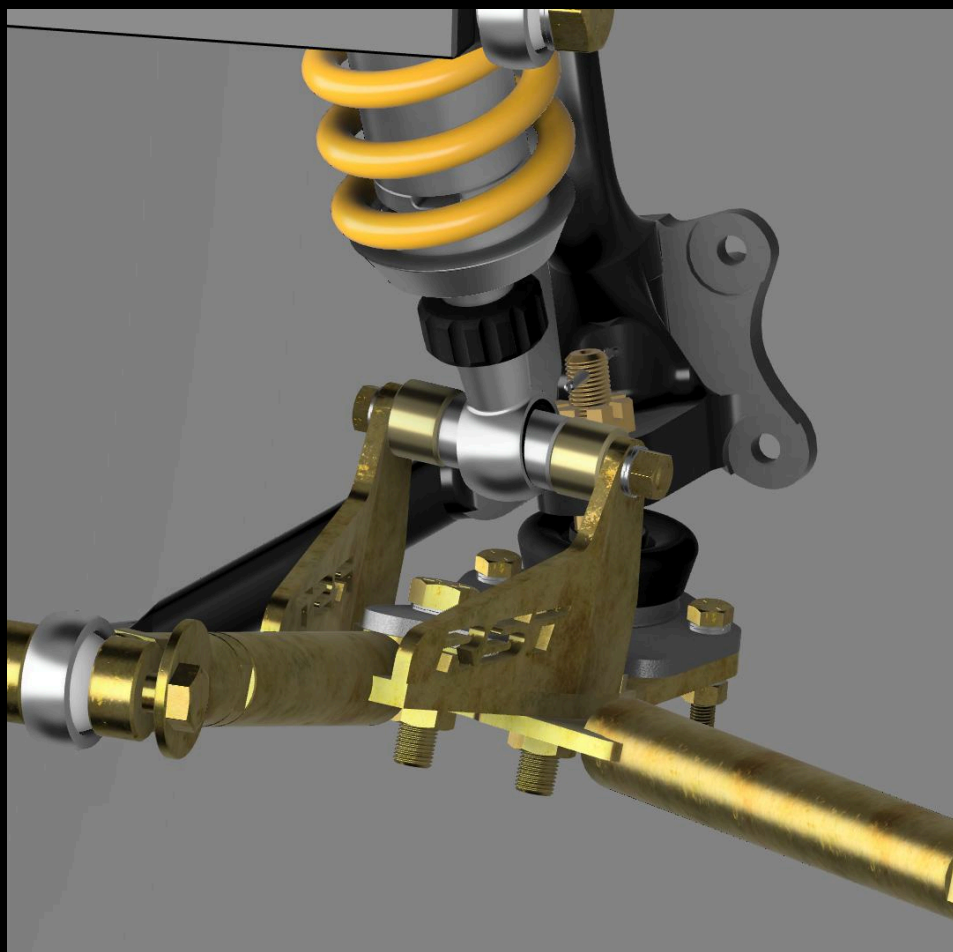

Ford Mustang Coupe 1964/5-1966

Ford Mustang Coupe 1967-1968

Ford Mustang Convertible 1964/5-1966

Ford Mustang Convertible 1967-1968

ASSEMBLY INSTRUCTIONS:

Technical data sheet

DIFFICULTY LEVEL:

Advanced - a high level of specialized knowledge is required to carry out the installation of this product.

NOTES:

- * The suspension system is compatible with the original stabilizer and stabilizer links
- ** No front knuckles included in the set
- *** Suspension installation does not require interference with the bodywork
- **** This suspension set includes the front axle of the vehicle
