PRODUCT DESCRIPTION

Housing for accessory gauges with a diameter of 52mm intended for classic Mustangs. The design was developed in a CAD environment using 3D laser scans of the interior. This guarantees a perfect fit and preserves the character of the classic car. The material used is high-quality filament, ensuring high mechanical strength and lightness at the same time. This material withstands contact with chemicals and continuous operating temperatures up to 160°C. The product has been painted in a glossy black color. To properly secure the gauges, locking screws were used.

Additionally, the product has space for four toggle switches, which can expand the functionality of the control system. They can be used to control accessory lighting and fans. The housing fits in the space under the console, above the gear lever.

MAIN PRODUCT FEATURES

- Production carried out based on 3D printing
- Material: PA12 + CF15 filament
- High durability
- Modern design - gives the interior a professional, sporty look

THE SET INCLUDES:

- Complete gauge housing
- Mounting kit

APPLICATION:

This product will fit the following model years of Ford Mustang:

- 1967 Fastback, Coupe, Convertible
- 1968 Fastback, Coupe, Convertible

ASSEMBLY INSTRUCTIONS:

Technical data sheet

DIFFICULTY LEVEL:

Easy - no specialized knowledge is required to install this product

NOTES:

none
