

Multi-link suspension eliminating all imperfections of the original system used in Ford Mustang cars. The suspension components are integrated with the lower strut mount, which positively affects the distribution of forces on the suspension elements and the vehicle's body.

The adjustable multi-link system based on mounts using Ohlins dampers and uniballs allows for precise adjustment of the front suspension geometry to achieve maximum grip on the front axle of the vehicle while cornering.

HIGH RESISTANCE
TO MECHANICAL DAMAGE

POSSIBILITY OF PRECISE
GEOMETRY ADJUSTMENT

ADJUSTABLE HEIGHT
OF THE BODY MOUNTING

ADDITIONAL SPACE
FOR CUSTOM EXHAUST HEADERS

PRODUCT DESCRIPTION

Our product significantly improves the driving characteristics of your vehicle. The multi-link suspension is technologically much more effective than the original system used in these models. Thanks to the use of turnbuckles, it is possible to adjust the length of the lower and upper arms.

The arms are made using CNC milling from high-quality 7075 aluminum, which is characterized by corrosion resistance, excellent weldability, and machinability. This alloy is valued for its strength and lightness.

The threaded Ohlins shock absorber set allows for vehicle height adjustment, which improves handling by lowering the center of gravity and positively affects aesthetics.

MAIN FEATURES OF THE PRODUCT

Additionally, the set includes a stabilizer bar designed by us, which increases the stiffness and stability of the suspension. It is made from high-quality 50HS spring steel, and its arms are milled from 7075 aluminum. The mounts are made from 2017A aluminum. Our custom stabilizer bar reduces body roll, complementing the improvement of the entire suspension system.

- Adjustable Front Suspension System
- Suspension based on Ohlins shock absorbers
- Adjustable height and damping value
- Significant improvement in vehicle control

**THE SET INCLUDES:**

- Complete set of machined control arms (4 pcs.)
- Upper shock absorber mounts with bushings (2 pcs.)
- Ohlins shock absorbers (2 pcs.)
- Complete set of uniballs (8 pcs.)
- Complete set of turnbuckles for control arm adjustment (8 pcs.)
- Complete set of control arm pins (upper and lower) (4 pcs.)
- Lower control arm mounts integrating the entire system with the cups and lower brace (2 pcs.)
- Upper control arm mounts Shelby Drop (2 pcs.)
- Reinforced lower brace
- Front stabilizer
- Mounting kit

APPLICATION:

This product will fit the following model years of Ford Mustang:

- 1965 Fastback, Coupe, Convertible
- 1966 Fastback, Coupe, Convertible
- 1967 Fastback, Coupe, Convertible
- 1968 Fastback, Coupe, Convertible

INSTALLATION INSTRUCTIONS:

Technical data sheet

DIFFICULTY LEVEL:

Advanced - a high level of specialized knowledge is required to carry out the installation of this product.

NOTES:

*The use of a given suspension system requires modifications to the lower control arm mounts

**No front knuckles included in the set

***Installation of the suspension requires intervention in the bodywork
