

A round sport steering wheel with a 340mm diameter, designed specifically for the 1968–1973 Ford Mustang, combines timeless design, modern manufacturing technologies, and racing ergonomics. The product is compatible with the original Ford Mustang hub featuring a 9x101.5mm bolt pattern, as well as the factory horn and trim ring. Four finish options are available: Alcantara wrap, leather wrap, forged carbon, or painted finish. Perfect for purists who wish to maintain the classic Mustang appearance while enhancing driving feel with a completely new level of control and precision.

COMPARED TO THE ORIGINAL**

PRECISION CRAFTSMANSHIP

PRODUCT DESCRIPTION

This product is a modern reinterpretation of a classic, significantly enhancing driving dynamics while preserving retro styling. Maintaining the traditional round profile, the steering wheel stays true to the original Mustang aesthetic while introducing performance-focused upgrades—such as contoured grips that improve handling and driver control. Crafted from high-strength PA9 (7075) aluminum alloy, the structure offers exceptional stiffness and durability. The handgrip is manufactured using advanced 3D technology from a high-performance composite reinforced with carbon fiber or forged carbon. Thanks to customizable finish options, the steering wheel can be tailored to perfectly match the style of your build.

KEY PRODUCT FEATURES

- Bolt Pattern: 9 bolts
- Round Shape - Classic style with modern ergonomic design
- Grip - Contoured recesses for improved handling and control during dynamic driving
- High Strength - Core constructed from durable PA9 (7075) aluminum

THE SET INCLUDES

- Steering wheel
- Mounting kit

APPLICATION

- Ford Mustang 1968-1973

INSTALLATION INSTRUCTIONS

Technical data sheet

DIFFICULTY LEVEL

Easy – car enthusiasts with basic knowledge will be able to install the purchased part.
