

An exhaust system that awakens a legend. Designed to deliver the deep sound of a classic V8 while enhancing real driving sensations and improving engine responsiveness. Manufactured from high-quality stainless steel and precisely fitted through the use of a 3D CAD design environment. What sets it apart from the competition is its modular, three-piece construction, which allows individual sections to be used or purchased separately without the need to install the complete system.

MODULAR THREE-PIECE DESIGN

DEEP V8 SOUND

ELECTRONICALLY CONTROLLED VALVES

PRECISION 3D CAD DESIGN

**PRODUCT DESCRIPTION:**

The GTM exhaust system features a modular, three-piece design that allows integration with the vehicle's factory exhaust system. Each section can be installed independently by welding V-band flanges at the connection points. Compared to the factory exhaust system, the design provides replacement of the OEM center muffler with a Z-pipe, X-pipe, or H-pipe section, improving exhaust flow and equalizing pressure between cylinder banks. The rear section is equipped with valves that allow manual opening and closing of the exhaust flow path, enabling changes to the system's operating characteristics. The exhaust system diameter is 2.5 inches. All components are made of AISI 304L stainless steel, and the connections between sections are executed using V-band technology, ensuring sealing, alignment, and serviceability.

**KEY PRODUCT FEATURES:**

- Three-piece design allowing each section to be integrated into the factory exhaust system by welding V-band flanges at the connection points
- Compared to the original exhaust system, center muffler has been replaced with a pressure-balancing section (Z-pipe, X-pipe, or H-pipe) - **do wyboru**
- Equipped with valves that allow manual opening and closing, affecting exhaust flow and the resulting sound
- Exhaust system diameter: 2.5 inches
- All connections executed using V-band joints

**THE SET INCLUDES:**

- First section with flexible couplings
- Second section – Z-pipe, X-pipe, H-pipe (available options)
- Third section containing the final exhaust components, including the mounting kit, electronic valves, and controller
- Exhaust hangers
- Exhaust tips (4 pcs) (to choose)
- Rear mufflers (2 pcs)
- Exhaust tip mounting clamps

**APPLICATION:**

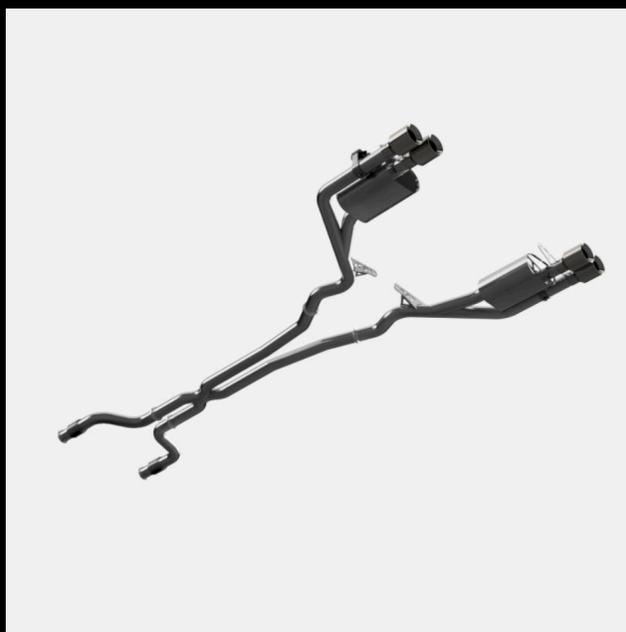

This product is compatible with the following Ford Mustang model years:

- 2015-2023 Fastback
- 2015-2023 Convertible

Our offer provides the option to choose a pressure-balancing section in the exhaust system:

- Z-pipe - The pipes cross in a configuration similar to a “Z”. Partial exhaust gas mixing, a relatively uncommon solution; effect intermediate between H and X.
- X-pipe - The pipes merge in an “X” configuration, allowing exhaust gases to mix. Better pulse equalization, higher efficiency at high RPM, sharper sound.
- H-pipe - The pipes are connected by a transverse “H” crossover. Primarily equalizes pressure, with less exhaust gas mixing, producing a lower and deeper tone.

**INSTALLATION INSTRUCTIONS:**

Technical data sheet

**DIFFICULTY LEVEL:**

Intermediate. Intended for installation by qualified individuals.

**NOTES:**

\*Before purchasing, please ensure that the product is compatible with your vehicle.
