

The 5.0 V8 engine in the Ford Mustang GT Gen 6 offers great potential, but during aggressive road driving or track use, the stock oil cooling system often proves insufficient. High oil temperature leads to faster lubricant degradation, reduced engine operating stability, and an increased risk of wear on key components.

The Restomotive engine oil cooler kit was developed as a dedicated solution for the Mustang GT Gen 6. Its design is focused on optimal airflow, effective heat dissipation, and installation using factory mounting points - without the problematic modifications typical of universal kits.

The result is more stable oil temperature, better engine protection, and greater confidence during dynamic driving and operation under high loads.

**HIGH THERMAL EFFICIENCY****DEDICATED MOUNTING****PREMIUM COMPONENTS****ENGINE PROTECTION**

#### PRODUCT DESCRIPTION

The Restomotive engine oil cooler kit for the Ford Mustang GT Gen 6 was developed for drivers who use the full potential of the 5.0 V8 engine during dynamic road driving and track use. In such conditions, the factory oil cooling system may not provide sufficient temperature stability, which can lead to faster oil degradation and increased load on key engine components.

At the heart of the kit is a 10-row aluminum Setrab oil cooler with high thermal efficiency, measuring 662 × 101 × 40 mm and featuring a 592 mm core length. Its construction has been selected to effectively dissipate heat while maintaining proper oil flow and pressure parameters. The cooler is designed to operate across a wide temperature range and is pressure- and leak-tested, ensuring high durability and safe operation.

#### KEY FEATURES OF THE PRODUCT

**High thermal performance:** The 10-row oil cooler effectively lowers oil temperature during dynamic driving and engine operation under high load.

**Aluminum construction:** The aluminum oil cooler provides low weight, good temperature resistance, and high heat exchange efficiency.

**Wide temperature operating range:** The system is designed to operate in temperatures from -40°C to 150°C, helping maintain stable performance in various operating conditions.

**Tested sealing and durability:** The oil cooler is designed for safe operation under pressure and resistance to demanding usage conditions.

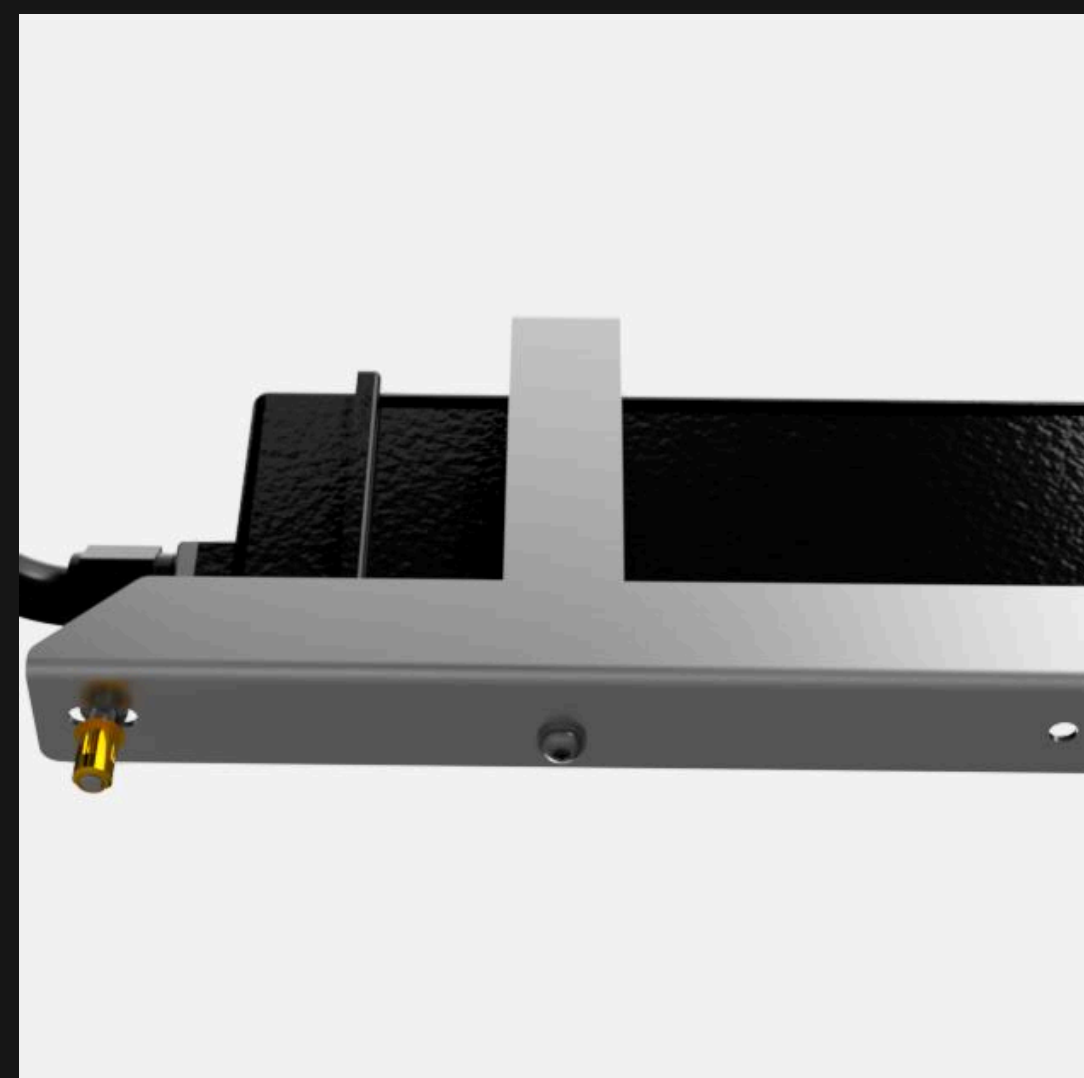

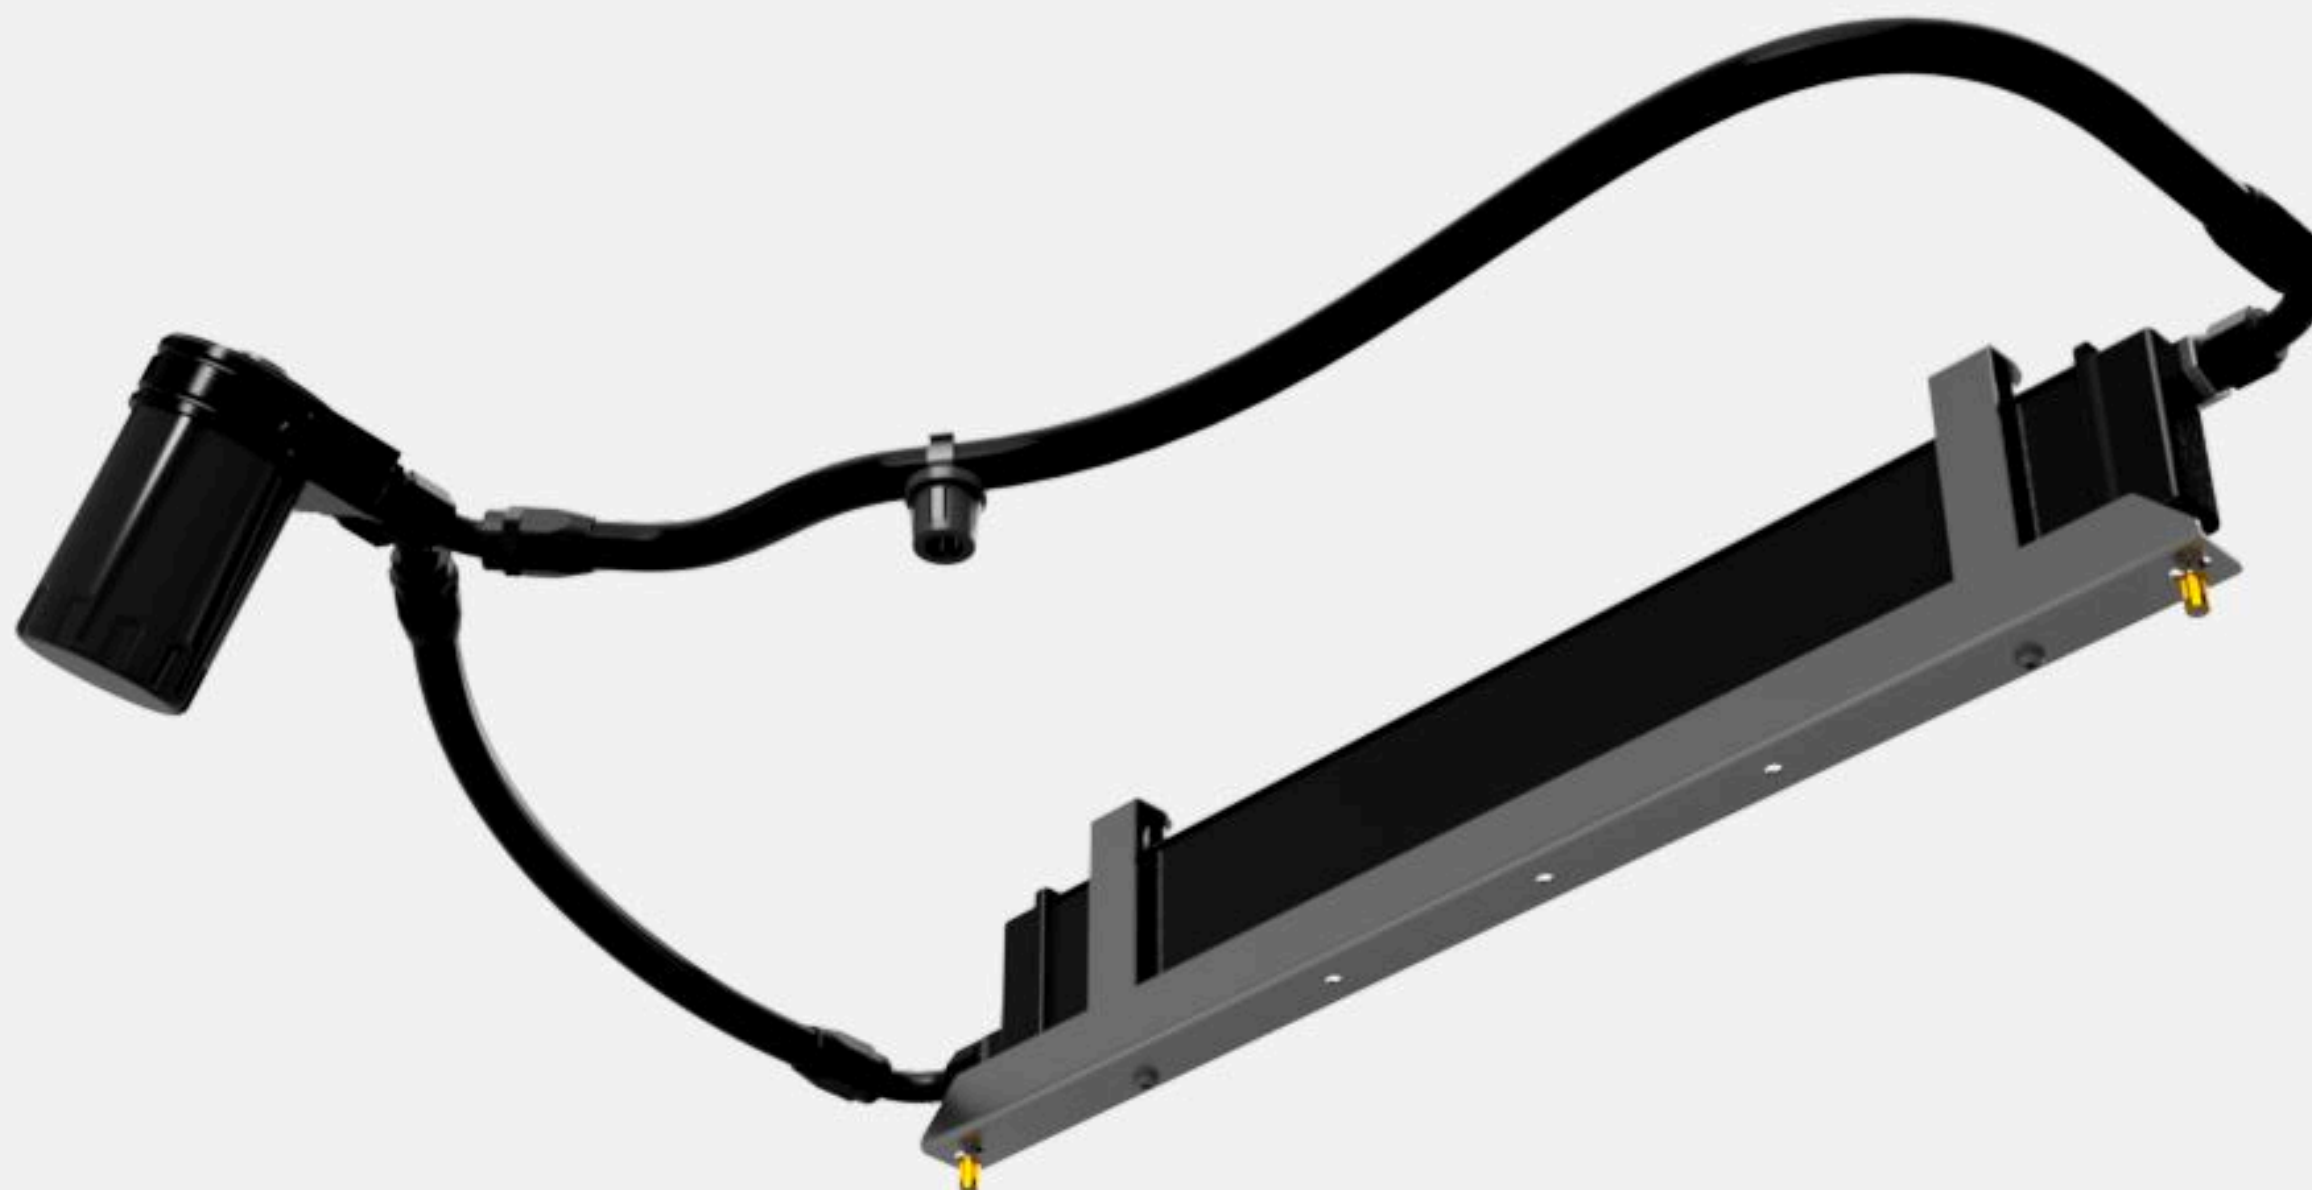

**THE SET INCLUDES:**

- Setrab Proline 10-row SLM oil cooler
- Oil cooler adapter base with AN10 thermostat
- AN10 45° fitting
- AN10 90° fitting
- AN10 PTFE Teflon hose in black steel braid
- Oil filter
- Water pipe
- M6 vibration isolators
- Sheet metal oil cooler bracket
- Oil cooler / adapter bolt
- Water pipe bracket

**ZASTOSOWANIE**

- Ford Mustang GT 5.0 2015-2017
- Ford Mustang GT 5.0 2018-2023
- Ford Mustang Bullitt 2019-2020
- Ford Mustang Mach 1 2021-2023

**ASSEMBLY INSTRUCTIONS:**

Technical data sheet

**LEVEL OF DIFFICULTY:**

Intermediate. Intended for installation by qualified personnel.

**COMMENTS:**

Before purchasing, ensure that the product is compatible with your vehicle.
