

Confidence in every inch. Designed to ensure the highest standard of safety and order in your vehicle. Our clips guarantee line stability even under the most demanding conditions.

UNIVERSAL MODULAR DESIGN

CHEMICAL AND THERMAL RESISTANCE

PRECISION 3D CAD DESIGN

FAST AND CONVENIENT INSTALLATION

**PRODUCT DESCRIPTION:**

Brake and fuel line clips are a reliable, universal design applicable to most vehicle models. Safe operation and a long service life result from the use of high-quality materials resistant to weather conditions, oils, fuels, and high temperatures. Furthermore, the precision craftsmanship-engineered using 3D CAD technology-ensures stable mounting, eliminating the risk of vibrations, play, and mechanical damage to the lines while driving.

KEY PRODUCT FEATURES:

- **Instant Installation:** Intuitive design allowing for quick securing of lines without the need for specialized tools.
- **Durability:** High material rigidity ensures a secure hold of the lines even under high G-loads.
- **Resistance:** Full immunity to chemical substances (brake fluid, gasoline, oils) and extreme temperatures within the engine bay and underbody.
- **Versatility:** Compatible with most standard brake and fuel lines available on the market.

THE SET INCLUDES:

- Triple line mounting with M5 bolt
- Selectable hole diameter range (4,75mm – 12mm)

APPLICATION:

The product is characterized by full universality.

INSTALLATION INSTRUCTIONS:

Technical data sheet

DIFFICULTY LEVEL:

Basic. Product designed for self-assembly.

NOTES:

The choice of installation method is left to the buyer.
