

PRODUCT DESCRIPTION:

The Wilwood Forged DynaPro 6 brake kit represents an advanced front axle modification. The system has been developed for direct integration with factory Mustang V8 spindles, ensuring a seamless installation in original mounting locations. The design utilizes 6-piston calipers characterized by exceptional structural rigidity, which eliminates the 'spongy pedal' feel even under extreme temperatures. The 12.19" (310 mm) rotors are vented, slotted, and drilled, resulting in superior heat dissipation and effective cleaning of the friction surface during operation. Kit components are manufactured from lightweight, high-strength alloys to reduce unsprung weight. The calipers are finished with a durable black anodized coating, providing a discreet, premium technical look and resistance to harsh operating conditions.

KEY PRODUCT FEATURES:

- 6-piston configuration provides significantly better pressure distribution across the pad than standard solutions.
- Marked improvement in safety and stopping distance compared to stock braking systems.
- Specific caliper profile designed to fit most classic 15-inch wheels.
- Utilization of forged aircraft-grade aluminum guarantees maximum strength with low weight.
- SRP drilled and slotted rotors actively prevent brake fade under high thermal loads.

SET INCLUDES:

- Wilwood Forged DynaPro 6 6-piston calipers (2 pcs)
- 12.19" SRP drilled and slotted vented rotors (2 pcs)
- Wilwood BP-10 SmartPad brake pads
- Aluminum rotor hats (hubs) and mounting brackets
- Complete set of bearings and seals
- Necessary bolts and installation hardware

APPLICATION:

Product dedicated to the following FORD models:

- Mustang: 1965-1969 (all V8 spindles); 1970 (GT350/500 only)
- Falcon: 1963-1964 (V8); 1965-1966 (V8); 1967-1969 (all); 1970 (drum brakes through 8/24/69)
- Fairlane: 1964-1965 (all); 1966-1969 (all spindles)
- Ranchero: 1963-1964 (V8); 1965 (V8); 1966-1969 (all spindles)
- Torino: 1968-1969 (all spindles)
- Maverick: 1970 (drum brakes through 8/24/69)

DIFFICULTY LEVEL:

Intermediate. Intended for installation by qualified individuals.

NOTES:

Before purchase, please verify the available clearance within your wheels. This kit is dedicated to V8 version hubs/spindles.
