ELECTRICALLY CONTROLLED EXHAUST VALVES 2.5"

PRODUCT CODE: 703.000.000.000.

The electrically controlled exhaust valve kit is designed for modifying exhaust systems, allowing remote control of exhaust gas flow and adjustment of the exhaust sound. Thanks to electric actuators and wireless remote controls, the driver can easily adjust the position of the valves.

The kit is designed for vehicles with dual exhaust systems that can accommodate 2.5-inch (63.5 mm) valves. Two valves and a shared control module allow both valves to be operated as part of a single system.

SPORTY SOUND AT THE TOUCH OF A BUTTON

TWO VALVES - ONE SYSTEM

ELECTRICALLY CONTROLLED EXHAUST VALVES 2.5"

PRODUCT CODE: 703.000.000.000.

PRODUCT DESCRIPTION:

This kit includes two electrically controlled exhaust valves that allow the driver to remotely regulate exhaust gas flow and change the vehicle's exhaust sound. With electric actuators and wireless remote controls, the driver can conveniently customize the sound to suit their preferences.

The 2.5-inch (63.5 mm) valves are equipped with electric actuators that control the position of the valve flaps. The system is operated by a central control module, and the kit includes connection cables and a power cable for the vehicle's 12V cigarette lighter socket.

The universal design makes this kit particularly suitable for vehicles with dual exhaust systems and custom tuning projects. Depending on the exhaust system configuration, the kit can provide a more aggressive, sporty exhaust sound.

KEY PRODUCT FEATURES:

- Dual Electric Exhaust Valves - Allow exhaust gas flow to be regulated in two sections of the exhaust system;
- Wireless Remote Control - Conveniently open and close the valves at the touch of a button;
- 2.5-Inch (63.5 mm) Diameter - Designed for compatible exhaust systems;
- Central Control Module - Controls both exhaust valves through one integrated system;
- Sporty Sound on Demand - Adjust the valve positions to customize the exhaust sound according to your driving preferences.

ELECTRICALLY CONTROLLED EXHAUST VALVES 2.5"

PRODUCT CODE: 703.000.000.000.

SET INCLUDES:

- Electric exhaust valve, 2.5-inch - 2 pcs;
- Wireless remote control - 2 pcs;
- Control module - 1 pc;
- Exhaust valve connection cable - 2 pcs;
- Power cable with 12V cigarette lighter plug - 1 pc.

APPLICATION:

This kit is designed for modifying exhaust systems in passenger and sports cars, particularly vehicles equipped with dual exhaust systems with a pipe diameter of 2.5 inches (63.5 mm).

DIFFICULTY LEVEL:

Intermediate. Intended for installation by qualified personnel.

NOTES:

Before purchasing, make sure that the product is compatible with your vehicle.
