EXHAUST SYSTEM - FRONT SECTION
FORD MUSTANG GEN 6

PRODUCT CODE: GTM.601.004.000.000

The GTM front exhaust section has been engineered as an integral part of our modular three-piece exhaust system for the Ford Mustang GEN6. This modular design allows the system to be expanded gradually and individual components to be freely combined while maintaining full compatibility across the entire exhaust system.

The section features flexible couplings that effectively reduce the transfer of vibrations and mechanical stress, increasing the durability of the exhaust system while improving driving comfort. V-band connections provide precise fitment, leak-free sealing, and allow for quick installation and removal of individual modules.

The entire section is manufactured from premium 2.5" AISI 304L stainless steel, offering excellent corrosion resistance, long-lasting durability, and an attractive finish that maintains its appearance for years.

- MODULAR DESIGN
- V-BAND CONNECTIONS
- FLEXIBLE COUPLINGS
- AISI 304L STAINLESS STEEL

PRODUCT CODE: GTM.601.004.000.000

PRODUCT DESCRIPTION

The GTM Front Section connects the exhaust manifolds to the rest of the system, serving as the first element of the modular exhaust system developed for the Ford Mustang GEN6. Thanks to its modular design, it can be used as a standalone component or as part of the complete GTM exhaust system.

The section is equipped with flex pipes that effectively compensate for engine movement and reduce the transfer of vibrations. The integrated V-band connections provide a durable, leak-free fit and allow for quick installation and removal of individual sections.

The entire assembly is manufactured from 2.5" AISI 304L stainless steel, ensuring excellent corrosion resistance, long-lasting durability, and a premium appearance for years of use.

KEY FEATURES OF THE PRODUCT

Modular Design – an independent element of the three-piece GTM exhaust system, allowing flexible configuration and future system expansion.

Flex Pipes – effectively reduce vibrations and mechanical stress, improving system durability and driving comfort.

V-Band Connections – provide a precise, leak-free fit and enable quick installation and removal of individual sections.

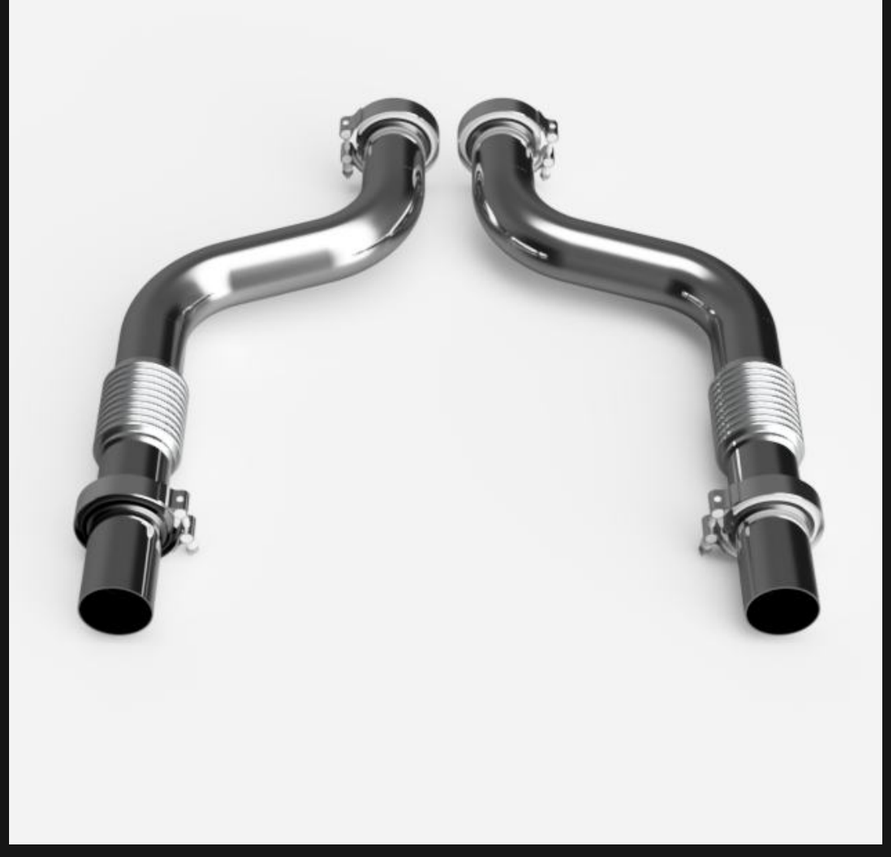

AISI 304L Stainless Steel – manufactured from high-quality 2.5″ stainless steel, offering excellent corrosion resistance, durability, and a premium appearance for years.

EXHAUST SYSTEM - FRONT SECTION
FORD MUSTANG GT GEN 6

PRODUCT CODE: GTM.601.004.000.000

THE SET INCLUDES

- Front section with flexible couplings
- V-bands (4 pcs.)

APPLICATION

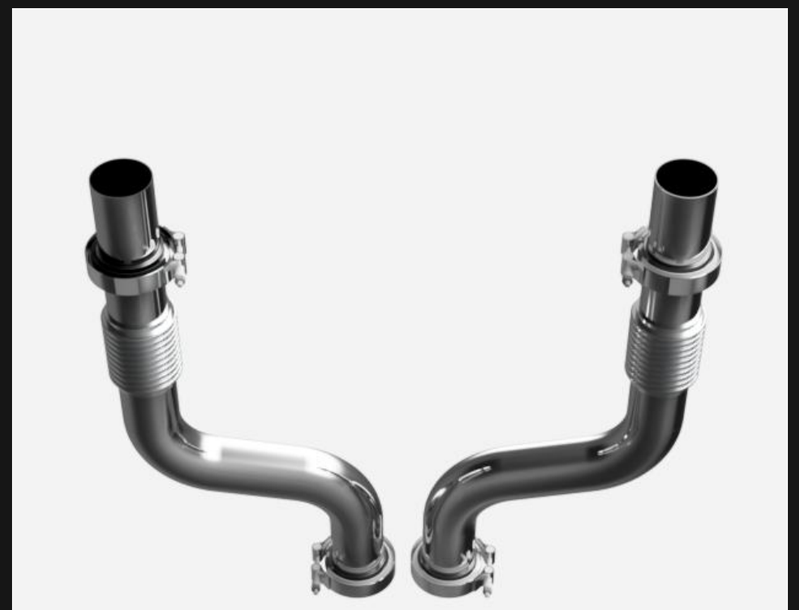

- Ford Mustang 3.7 V6 Gen VI
- Ford Mustang 5.0 V8 Gen VI
- Ford Mustang 5.0 V8 Bullitt Gen VI
- Ford Mustang 5.2 Shelby GT350 Gen VI
- Ford Mustang 5.2 Shelby GT500 Gen VI
